XL³ S NEW ENCLOSURES

The XL³ S range has been specially designed to make the panel builder's job easier.

The strength and reliability of factory-assembled XL³ S enclosures, the comprehensive range, plus the numerous accessories offering a high degree of flexibility in installation are the main advantages of this new range.

Extent of the range

The XL³ S range consists of 3 families of enclosures in order to adapt to your site requirements as closely as possible: XL³ S 160, XL³ S 630 and XL³ S 4000.

The dimensions and capacities are designed in order to simplify choice and optimise costs, resulting in enclosures that are perfectly suited to your sites.

Faster installation time and ease of assembly

- Different fixing accessories created for easier assembly and finishing.

- All the enclosures are supplied ready-assembled in modular format.

- The new XL³ S 630 and 4000 enclosures benefit from common accessories, making it possible to optimise the amount of catalogue numbers in stock.
- They also benefit from dedicated supports which allow you to create a distribution system with copper or aluminium busbars.

Strength, rigidity and reliability

- Metal enclosures, with one-piece structure for maximum rigidity.
- Factory-assembled for guaranteed quality.
- Products certified by an independent body (LOVAG), allowing assemblies certified IEC 61439-2 and -3 to be created.

Services and tools

To aid the design, installation and maintenance of electrical panels.

- Range integrated in XLPro³.

- Technical support.
- Assembly instructions and guides (workshop specifications, assembly videos).

XL³ S 160

ONE-PIECE MODULAR ENCLOSURES READY TO USE

1 enclosure = 1 complete ready-to-use product

- One-piece metal enclosure for simple selection.
- IP30 without door/IP40 with door.
- A complete range available in both surface-mounting and flush-mounting versions for discreet integration in their environment, even outside an equipment room.
- Thanks to versions with 36 modules per row, you can create large-capacity enclosures with up to 288 modules to satisfy the requirements of commercial sector sites.

36 modules per row

No. of modules/row	24	36
No. of rows	2 to 8	4 to 8
Capacity (no. of modules)	48 to 192	144 to 288

 Removable multi-row faceplates.
The height of the first and last row is optimised (200 mm) to take DPX³ 160 and DRX 125 MCCBs.

 Removable chassis allowing devices to be installed and wired outside the enclosure.

NUMEROUS ACCESSORIES FOR EASIER INSTALLATION AND SIMPLER MAINTENANCE

Wall mounting lugs

Blanking plates

Clip-on holders for self-adhesive labels

Self-adhesive document holders for plans

Height spacer, can be used to combine MCBs and MCCBs on the same rail

XL³ S 160 - 24 modules - 2 and 4 rows

Equipped with cable entry plates with cut-outs to save time when installing

High-quality finish: White RAL 9003.

XL³ S enclosures can be equipped with metal reversible doors.

Option of vertical joining thanks to the dedicated kit.

Adjustable-depth DIN rails and removable, thus allowing 3 types of device to be mounted:

- modular devices
- DPX³ 160 MCCBs
- DRX 125 MCCBs or other devices of the same depth

Equipped with supports for earth terminal blocks ready to take:

- IP2X terminal blocks
- brass terminal blocks
- copper terminal blocks

XL³ S 630 4000

CONFIGURABLE ENCLOSURES

- Rugged metal enclosures.
- Enclosures can be configured for greater flexibility depending on the choice of circuit breaker.
- Supplied assembled to save time when installing.
- **XL³ S 630**: 1 catalogue number = base + roof + structural uprights + functional uprights + fixing support for faceplates + rear panel.
- **XL³ S 4000**: 1 catalogue number = base + roof + structural uprights + corner pieces for plinth.
- **XL³ S 4000 corner enclosures**: 1 catalogue number = base + roof + structural uprights + rear panels + metal door + plinth.
- IP30 without door/IP40 with door/IP43 with the dedicated kit.

KEY POINTS

4000

 Finishing kit for perfect aesthetic finish of enclosures without a door.

 Faceplates with cut-outs available in all 3 enclosure widths to house the various protection devices up to 630 A (including in the 16-module width).

 Fixed with (to be ordered separately):

- screws
- 1/4-turn screws
- snap-on fixing clips

Screw

1/4-turn screw

Snap-on fixing clips

 Corner pieces for the plinth and trim panels supplied separately.

 Covers all enclosure dimensions with a minimum amount of catalogue numbers to keep in stock.

 High-quality finish:

- Metal doors and faceplates: White RAL 9003
- Body: Black RAL 7016

 XL³ S enclosures can be equipped with metal or glass reversible doors.

 Reversible handle.

Solid door

Glass door

 The side panels of XL³ S 630 enclosures should be ordered separately, so that only the amount needed for installation are used, especially when enclosures are joined.

NUMEROUS ACCESSORIES FOR EASIER INSTALLATION AND SIMPLER MAINTENANCE

Lifting rings

Blanking plates

Clip-on holders for self-adhesive labels

Self-adhesive document holders for plans

Height spacer, can be used to combine MCBs and MCCBs on the same row

Fixing support for faceplates (supplied with the enclosure for XL³ S 630s).

Internal cable sleeve kit.

System for fixing plates on functional uprights with self-tapping screws.

Rails and universal plates (solid or perforated) allow even greater freedom when selecting devices.

Devices mounted on plate vertically and horizontally, with a reduced-height version to save even more time and optimise the whole installation to suit the busbar.

Adjustable-depth DIN rails which can be removed, allowing 3 types of device to be mounted:

- modular devices
- DPX³ 160 MCCBs
- DRX 125 MCCBs or other devices of the same depth

Removable cable gland plate. Can be replaced by a Cabstop plate to save even more time when installing.

Option of joining at the side with dedicated kits (standard or reinforced) in order to increase the number of possible configurations and allow the installation to expand.

XL³ S 4000

KEY POINTS

 The corner enclosures allow to easily join together multiple XL³ S 4000 enclosures to make 90° configurations (in L, U or T).

They are particularly useful for saving space in the case of technical rooms that can not accommodate large width assemblies.

 In addition to their original function (joining together XL³ S 4000 enclosures) the corner cabinets offer all the necessary space for the cables and busbars passage between two enclosures. They ensure optimum cabling space, good protection and quick access for any wiring operations.

 XL³ S 4000 corner enclosures are supplied with rear panels, metal door and plinth.

As for the other enclosures of the range it is possible to increase the plinth height by 100 mm.

The corner enclosures are not designed to accommodate protection devices.

 Adjustable depth, galvanized steel full-height solid mounting plates.

For XL³ S 4000 enclosures: 2000 or 2200 mm height and 600 or 800 mm width. Allow free configurations of screw fixing equipment (like contactors, thermal relays, power supplies, transformers, automation devices, etc.).

 Markings to facilitate device positioning (graduations every 1 and every 10 cm).

 The "partial width" (200 mm) side panel is used when joining together two XL³ S 4000 enclosures of different depths.

Example of a 400 mm depth enclosure joined to a 600 mm depth enclosure.

XL³ S 630

Fixing crosspieces and isolating supports for copper or aluminium busbars, specially designed to simplify selection, while allowing you to meet the requirements of your sites up to 630 A.

COPPER & ALUMINIUM DISTRIBUTION

XL³ S 630 enclosure equipped with copper busbars: main transfer horizontal + vertical in cable sleeve

Fixing crosspiece

Thanks to the unique crosspiece fixing system, you have the option of fixing supports for copper or C-section aluminium busbars regardless of the enclosure dimensions.

COPPER DISTRIBUTION

- Isolating support for copper busbars in sloping position for easier wiring.
- Mounted in vertical or horizontal position using fixing crosspieces adapted to the different enclosure widths.
- Isolating support available in sloping or staggered position for greater configuration flexibility.

- Isolating support for copper busbar in aligned position.
- Fixing crosspiece for busbar is screwed directly on the functional uprights at the back of the enclosure.

ALUMINIUM DISTRIBUTION

- Isolating support for C-section aluminium busbars in staggered position.
- Also available in aligned position version for busbar at the back of the enclosure.
- Aluminium distribution makes wiring faster and saves money on the whole installation.

XL³ S 4000

System of crosspieces and isolating supports for busbars up to 4000 A, designed to adapt easily to the different enclosure widths and depths, to the different mounting positions and to save you as much time as possible during installation.

COPPER & ALUMINIUM DISTRIBUTION

COPPER OR ALUMINIUM DISTRIBUTION USING THE DEDICATED KITS

- Isolating support equipped with kit for copper bars.
- Mounted in vertical or horizontal position.
- Thanks to the kits for busbars, the isolating support can be used to install copper bars 5 or 10 mm thick and for heights between 50 and 125 mm.

- Isolating support equipped with kit for C-section aluminium bars (75 and 125 mm fixing centres).
- Mounted in vertical or horizontal position.
- The support kit for double C-section aluminium busbars can be used to increase the current on busbars up to 3200 A.

ALUMINIUM DISTRIBUTION

- Isolating support for C-section aluminium busbar in staggered position.
- Also available in aligned position version for busbar at the back of the enclosure.
- The XL³ S 630 distribution system can also be installed vertically in XL³ S 4000 enclosures.

1: Only if fixed supports are added between the cabinet structural uprights (depending on required IpK)
 2: The horizontal main busbar is in the front position in the cabinet. The vertical busbars are therefore accessible from the front of the enclosure, behind the front panel (mainly via the cable sleeves).
 3: The horizontal main busbar is at the back of the enclosure. The vertical busbars are accessible from the back of the enclosure, by removing the rear panels.
 4: Connection possible only with a horizontal top or bottom busbar made of C-section aluminium bars. 5: Partial chassis.

1: The horizontal main busbar is in the front position in the cabinet. The vertical busbars are therefore accessible from the front of the enclosure, behind the front panel (mainly via the cable sleeves).
 2: The horizontal main busbar is at the back of the enclosure. The vertical busbars are accessible from the back of the enclosure, by removing the rear panels.
 3: Connection possible only with a horizontal top or bottom busbar made of C-section aluminium bars.
 4: Partial chassis. 5: Mounting behind the crosspiece of the central upright.
